

# Lone Tree Hill 9.2.25 Parterre Ecological Field Notes

8/28/25 4:07 PM

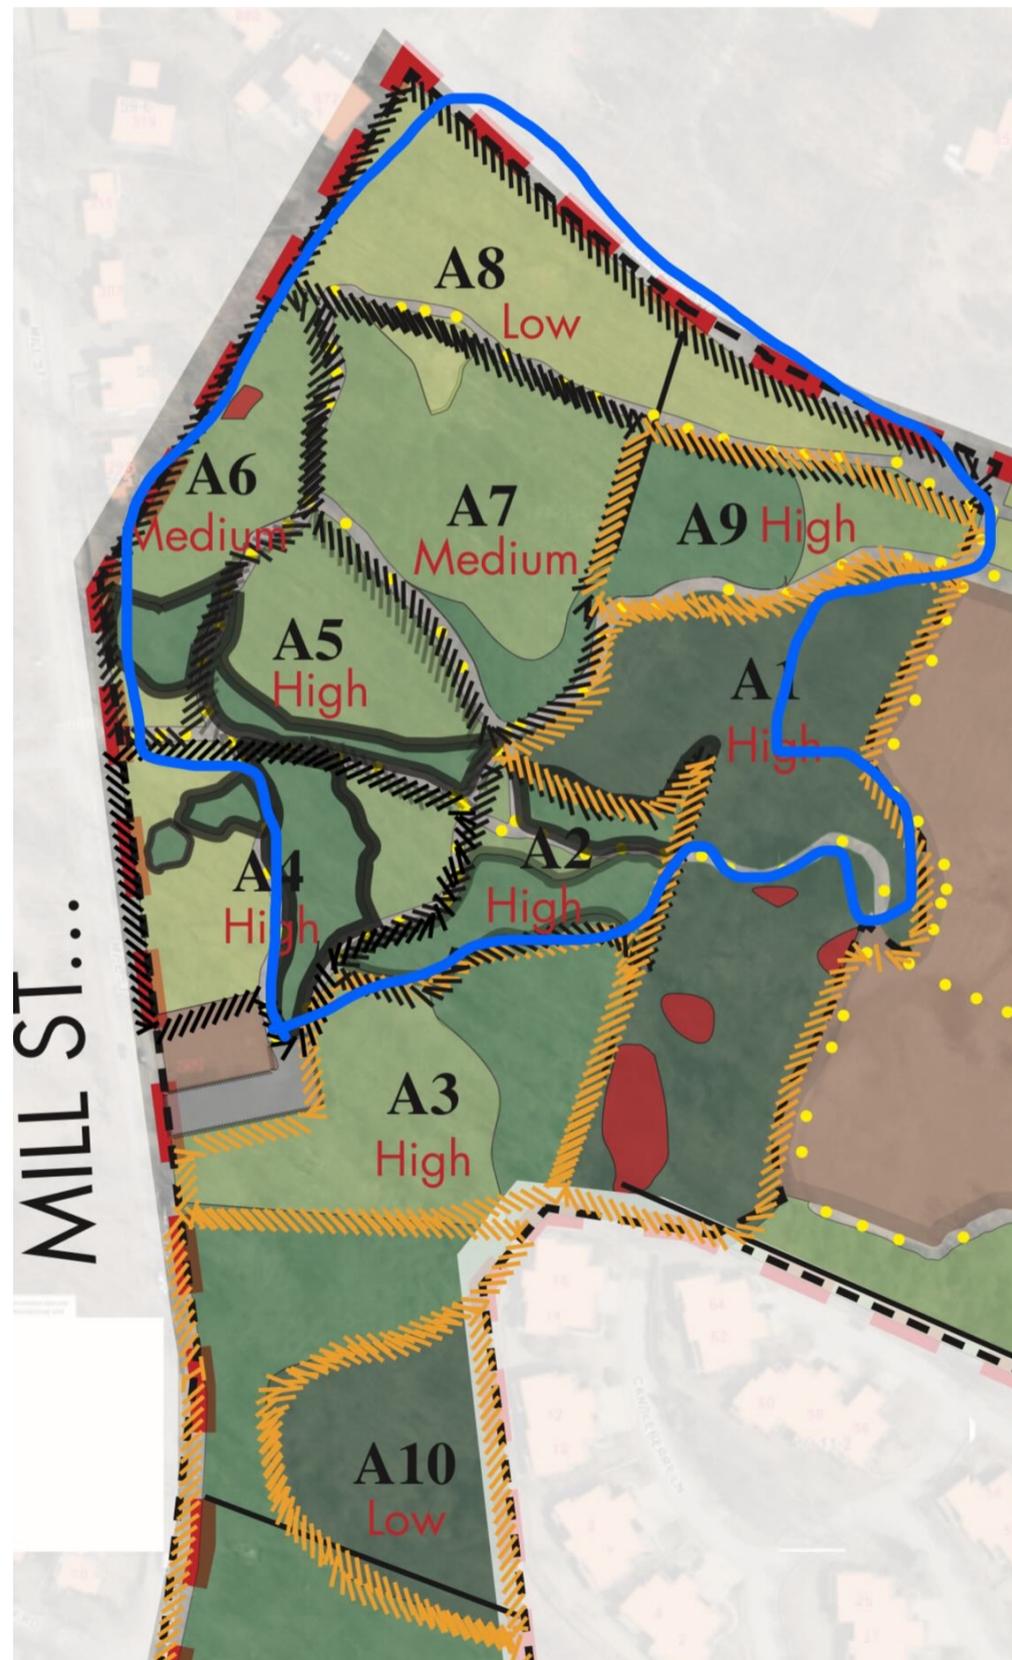

Date: 8/28 - 9/2/25

Team: Kaelyn, Cole, King

Work Completed:

- Spray treatment of woody invasives including glossy and common buckthorn, bittersweet, honeysuckle and porcelain berry in section A

Treatment Area:

Observations/Future Work:

- The regrowth in sections A4-A8 are very minimal, the treatment has significantly reduced the invasive coverage in these areas.
- We will continue monitoring and treating invasives in the more dense areas as needed
