

6.12.25 Eco Field Notes Lone Tree Hill

6/12/25 3:34 PM

Address: Lone Tree Hill Conservation Land,
Belmont, MA

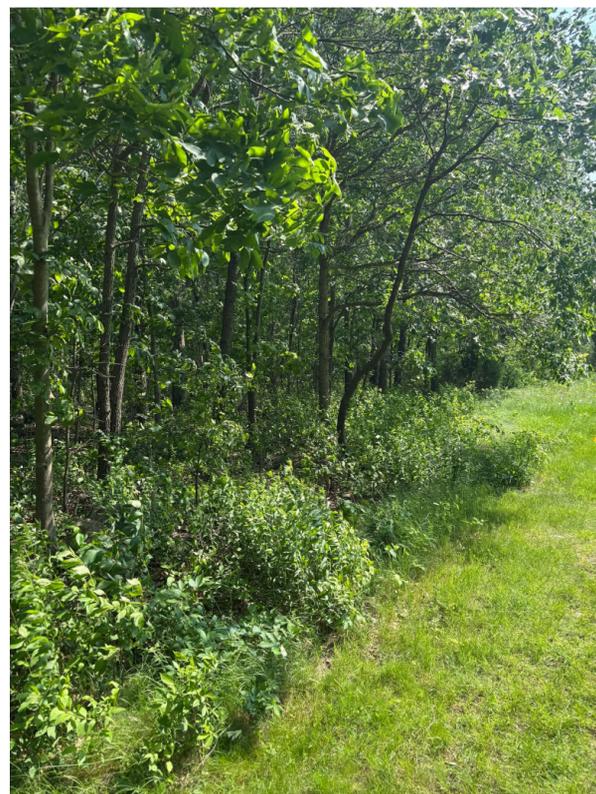

Primary Contact: Tom Grimble

Email: lonetreehillbelmont@gmail.com

Team: Max, Kaelyn, Julia

Work Completed:

- Sprayed two meadow areas for invasives. Species included: Black swallowwort, Hineysuckle, bittersweet, glossy buckthorn, porcelain berry, and multiflora rose.

Areas sprayed

Observations/ Future work:

- The meadow has a lot of great natives popping up that we would like to continue to propagate. Porcelain berry has been the main target as it really took off recently. We will want to contain that quickly and thoroughly.
