

Year 7 Annual Report
Massachusetts Small MS4 General Permit
Reporting Period: July 1, 2024-June 30, 2025

Please DO NOT attach any documents to this form. Instead, attach all requested documents to an email when submitting the form. Also ensure any websites included on this form are to publicly accessible sites

Unless otherwise noted, all fields are required to be filled out. If a field is left blank, it will be assumed the requirement or task has not been completed. Please ONLY report on activities between July 1, 2024 and June 30, 2025 unless otherwise requested.

Part I: Contact Information

Name of Municipality or Organization:

EPA NPDES Permit Number:

Primary MS4 Program Manager Contact Information

Name: Title:

Street Address Line 1:

Street Address Line 2:

City: State: Zip Code:

Email: Phone Number:

Stormwater Management Program (SWMP) Information

SWMP Location (publicly available web address):

Date SWMP was Last Updated:

If the SWMP is not available on the web please provide the physical address:

Part II: Self-Assessment

First, in the box below, select the impairment(s) and/or TMDL(s) that are applicable to your MS4. Make sure you are referring to the most recent EPA approved Section 303(d) Impaired Waters List which can be found here: <https://www.epa.gov/tmdl/region-1-impaired-waters-and-303d-lists-state>

| | | | |
|--|--|---|--|
| Impairment(s) | | | |
| <input checked="" type="checkbox"/> Bacteria/Pathogens | <input checked="" type="checkbox"/> Chloride | <input type="checkbox"/> Nitrogen | <input checked="" type="checkbox"/> Phosphorus |
| <input checked="" type="checkbox"/> Solids/ Oil/ Grease (Hydrocarbons)/ Metals | | | |
| TMDL(s) | | | |
| <i>In State:</i> | <input type="checkbox"/> Assabet River Phosphorus | <input type="checkbox"/> Bacteria and Pathogen | <input type="checkbox"/> Cape Cod Nitrogen |
| | <input checked="" type="checkbox"/> Charles River Watershed Phosphorus | <input type="checkbox"/> Lake and Pond Phosphorus | |
| <i>Out of State:</i> | <input type="checkbox"/> Bacteria/Pathogens | <input type="checkbox"/> Metals | <input type="checkbox"/> Nitrogen |
| | | | <input type="checkbox"/> Phosphorus |
| | | | <input type="button" value="Clear Impairments and TMDLs"/> |

Next, check off all requirements below that have been completed. **By checking each box you are certifying that you have completed that permit requirement fully.** If you have not completed a requirement leave the box unchecked. Additional information will be requested in later sections.

Year 7 Requirements

- Completed catchment investigations associated with Problem Outfalls
- Completed catchment investigations where information gathered on the outfall/interconnection indicated sewer input

Annual Requirements

- Provided an opportunity for public participation in review and implementation of SWMP and complied with State Public Notice requirements
- Kept records relating to the permit available for 5 years and made available to the public
- The SSO inventory has been updated, including the status of mitigation and corrective measures implemented
 - This is not applicable because we do not have sanitary sewer
 - This is not applicable because we did not find any new SSOs
 - The updated SSO inventory is attached to the email submission
 - The updated SSO inventory can be found at the following publicly available website:

- Updated system map due in year 10 with information from completed catchment investigations
- Provided training to employees involved in IDDE program within the reporting period
- Properly stored and disposed of catch basin cleanings and street sweepings so they did not discharge to receiving waters

- All curbed roadways were swept at least once within the reporting period
- Enclosed all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Updated inventory of all permittee owned facilities as necessary
- O&M programs for all permittee owned facilities have been completed and updated as necessary
- Implemented all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Inspected all permittee owned treatment structures (excluding catch basins)

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Bacteria/ Pathogens (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Annual message was distributed encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Permittee or its agents disseminated educational material to dog owners at the time of issuance or renewal of dog license, or other appropriate time
- Provided information to owners of septic systems about proper maintenance in any catchment that discharges to a water body impaired for bacteria
 - This is not applicable because there are no septic systems present

** Public education messages can be combined with other public education requirements as applicable (see Appendix F and H for more information)*

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

The DPW has also installed signage in public parks and open spaces encouraging residents to properly dispose of pet waste.

Chloride

Annual Requirements

Public Education and Outreach

- Included an annual message in November/ December to private road salt applicators and commercial
 industrial site owners on the proper storage and application rates of winter deicing material, along with the steps that can be taken to minimize salt use and protect local waterbodies

The following type(s) of salt were applied **during this reporting period (year 7)**:

- Sodium chloride
 Calcium chloride
 Potassium chloride
 Magnesium chloride
 Brine solution

Total amount of salt applied **during this reporting period (year 7) including units:** 3,142 tons

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

The Town developed a Salt Reduction Plan which is included as an attachment in the email submission. The Plan includes a sample annual message to be mailed November/December 2025.

Phosphorus (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Distributed an annual message in the spring (April/May) encouraging the proper use and disposal of grass clippings and encouraging the proper use of slow-release and phosphorus-free fertilizers
 Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
 Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter

** Public education messages can be combined with other public education requirements as applicable (see Appendix H and F for more information)*

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall)

Structural BMPs

- Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (*e.g. biofiltration*):

Stormwater BMPs at the new Belmont High School include Contech hydrodynamic separators and permeable pavement. Two additional public parcels, (skating rink and library) are under construction and will include infiltration trench, rain garden, and Jellyfish filters.

- Any structural BMPs already existing or installed in the regulated area by the permittee or its agents was tracked and the phosphorus removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated phosphorus removed in mass per year by the BMP were documented.

- No BMPs were installed
- The above referenced BMP information is attached to the email submission
- The above referenced BMP information can be found at the following publicly available website:

https://www.belmont-ma.gov/sites/g/files/vyhlf12826/f/uploads/06-26-23_pcp_draft.pdf

Total estimated phosphorus removed in **lbs/year** from the installed BMPs:

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

The reported amount for phosphorus removed of 0.57 lb/yr is for the portion of the Town within the Charles River watershed and includes only installed Town-owned structural BMPs. Privately-owned structural BMPs are not included in this amount. This information is provided in the Town's Phase I Phosphorus Control Plan. The Town also developed the Phosphorus Source Identification Report for both Charles and Mystic Watersheds during PY5. A town-wide inventory of structural BMPs was developed during PY7 including both public and private BMPs. Anticipate Rink and Library construction to be complete PY8 and those credits will be reported next year. The Town is also working with the Mystic River Watershed Association (MyRWA) on a grant that if awarded will provide \$120k for an estimated 8 infiltration trenches town-wide. All required educational materials were disseminated, and the Town is working on better aligning the timing with permit requirements.

Solids, Oil and Grease (Hydrocarbons), or Metals

Annual Requirements

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots to a schedule that targets areas with potential for high pollutant loads
 - The street sweeping schedule is attached to the email submission
 - The street sweeping schedule can be found at the following publicly available website:

<https://www.belmont-ma.gov/216/stormwater-management-program-swmp-appendices>

- Prioritized inspection and maintenance for catch basins to ensure that no sump shall be more than 50 percent full; Cleaned catch basins more frequently if inspection and maintenance activities indicated excessive sediment or debris loadings

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

The contractor used for catch basin cleaning will be required to note the percent fill of all catch basins in the upcoming year. Street sweeping schedule is discussed in the SWMP, the Street Sweeping SOP, and the Charles River Phase I PCP.

Charles River Watershed Phosphorus TMDL

Below, calculate your current phosphorus export rate by first filling out the individual phosphorus loading components (labeled [A], [B], [C], and [D]) and then computing your current phosphorus export rate using the equation provided.

| | |
|--|--------|
| Baseline phosphorus export rate from PCP Area, as identified in Appendix F (lbs/year) [A]: | 231.5 |
| Total phosphorus reduction from all nonstructural controls implemented this reporting period (lbs/year) [B]: | 0.36 |
| Total phosphorus reduction from all structural controls installed this reporting period and all previous years (lbs/year) [C]: | 0 |
| Phosphorus load increase due to development incurred since 2005 in lbs/year [D]: | -30 |
| Current phosphorus export rate from the PCP Area in lbs/year [=A-(B+C)+D from above]: | 201.14 |

- I certify under penalty of law that all source control and treatment Best Management Practices being claimed for phosphorus reduction credit have been inspected, maintained and repaired in accordance
- with manufacturer or design specification. I certify that, to the best of my knowledge, all Best Management Practices being claimed for a phosphorus reduction credit are performing as originally designed.
 - All municipally owned and maintained turf grass areas are being managed in accordance with Massachusetts Regulation 331 CMR 31 pertaining to proper use of fertilizers on turf grasses
 - Implemented all nonstructural control measures **during this reporting period** and documented the measures and their phosphorus reduction. The nonstructural control measure information:
 - is attached to the email submission
 - can be found at the following publicly available website:

<https://www.belmont-ma.gov/documentcenter/view/941>

- Documented the structural control measures implemented during **this reporting period and all previous years**, including location, phosphorus reduction in mass/year, and date of last completed maintenance and inspection for each control. The structural control measure information:
 - is not applicable; no structural control measures were implemented
 - is attached to the email submission
 - can be found at the following publicly available website:

<https://www.belmont-ma.gov/documentcenter/view/941>

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

An inventory of existing structural controls in the Charles River watershed has been developed and continues to be updated. All existing structural controls are privately-owned/maintained. The Town has calculated treatment credit for most of the privately-owned BMPs as documented in the Phase I PCP, but the credit is not reported here because inspection/maintenance has not been confirmed/documentated yet - the Town is working on developing a process for this.

NON-TRADITIONAL AND TRANSPORTATION MS4s ONLY- municipalities please skip this section:

Describe the planned phosphorus reduction activities on site and coordination progress with the applicable municipality:

NA

Optional: Use the box below to provide any additional information you would like to share as part of your self-assessment:

NA

Part III: Receiving Waters/Impaired Waters/TMDL

Have you made any changes to your lists of receiving waters, outfalls, or impairments since the NOI was submitted?

- Yes
 No

If yes, describe below, including any relevant impairments or TMDLs:

Per the Final MA Integrated List of Waters for the 2018/2020 Reporting Cycle, the Alewife Brook was updated from MA71-04 to three new segments including MA71-20 (Alewife Brook), MA71-21 (Little River), and MA71-22 (Little River). Four impairments were added to Alewife Brook MA71-20 (Chloride, copper in sediment, lead in sediment, and water chestnut (non-pollutant)) and two were removed (copper and lead). Three impairments were changed (total phosphorus and DO covered under an Alternative Restoration Plan and e. Coli TMDL established)

One impairment was added to Little Pond MA71024 (water chestnut (non-pollutant))

Two impairments were added to Spy Pond MA71040 (Curly-leaf pondweed and water chestnut (both non-pollutants))

Two impairments were added to Beaver Brook MA72-28 (Chloride and water chestnut (non-pollutant)) and one was removed (non-native aquatic plants).

Winn Brook MA71-09 changed from Category 5 to Category 4a (e. coli TMDL established).

Part IV: Minimum Control Measures

Please fill out all of the metrics below. If applicable, include in the description who completed the task if completed by a third party.

MCM1: Public Education

Number of educational messages completed **during this reporting period:**

Below, report on the educational messages completed **during this reporting period**. For the measurable goal(s) please describe the method/measures used to assess the overall effectiveness of the educational program.

BMP:1. Pet Waste Flyer

Message Description and Distribution Method:

Educational flyer about pet waste disposal distributed annually with pet license applications/renewals (January), and on Town website permanently. Also a message from the Belmont Board of Health encouraging residents to pick up their pet waste and outlining the health/environmental consequences of leaving it be can be found on the Town Clerk's website

Targeted Audience:

Responsible Department/Parties:

Measurable Goal(s):

Maintain public access to this information by keeping it posted on the Town website and ensuring new owners are aware of town regulations regarding pet waste.

Message Date(s):

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: 2. Septic System Maintenance

Message Description and Distribution Method:

Eduational message about septic system maintenance distributed monthly with water billing, and on Town website permanently. Also a message from the Belmont Board of Health detailing septic systems and encouraging residents to maintain their septic systems can be found on the Health Department's website.

Targeted Audience:

Responsible Department/Parties:

Measurable Goal(s):

Maintain public access to this information by keeping it posted on the Health Department website and Town

stormwater webpage.

Message Date(s): Monthly mailings, year-round on website

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: 3. Fertilizers

Message Description and Distribution Method:

Educational message about fertilizers distributed October with water billing, and on Town website permanently.

Targeted Audience: Residents

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

Maintain public access to this information by keeping it posted on the Town stormwater webpage.

Message Date(s): October 2024 (mailing); year-round on website

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: 4. Yard Waste Disposal

Message Description and Distribution Method:

Educational flyer about yard waste/leaf litter for residents and businesses distributed in October 2024 with water billing, and on Town website permanently.

Targeted Audience: Residents, Businesses, institutions, commercial facilities

Responsible Department/Parties: DPW Operations

Measurable Goal(s):

Maintain public access to this information by keeping it posted on the Town website and ensuring residents are reminded annually of proper disposal options with trash/recycling calendar.

Message Date(s):

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

MCM2: Public Participation

Describe the opportunity provided for public involvement in the development of the Stormwater Management Program (SWMP) **during this reporting period:**

The Town's SWMP and Phase I Phosphorus Control Plan are available for public review on the stormwater web page.

Was this opportunity different than what was proposed in your NOI? Yes No

Describe any other public involvement or participation opportunities conducted **during this reporting period:**

The Town of Belmont has a Stormwater working group consisting of residents that cooperate with the DPW. This group has helped spread awareness of stormwater BMPs, assisted with educational message distribution, and supported the MVP program.

MCM3: Illicit Discharge Detection and Elimination (IDDE)

Sanitary Sewer Overflows (SSOs)

Check off the box below if the statement is true.

This SSO section is NOT applicable because we DO NOT have sanitary sewer

*Below, report on the number of SSOs identified in the MS4 system and removed **during this reporting period.***

Number of SSOs identified:

Number of SSOs removed:

MS4 System Mapping

Percent of Phase II map complete:

Optional: Provide additional status information regarding your map:

All required elements of the Phase II map are complete, as well as many of the recommended elements. GIS edits continue to be made as needed based on field inspections and new construction.

Screening of Outfalls/Interconnections

If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring results should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses. Please also include the updated inventory and ranking of outfalls/interconnections based on monitoring results.

- No outfalls were inspected
- The above referenced outfall screening data is attached to the email submission
- The above referenced outfall screening data can be found at the following publicly available website:

*Below, report on the number of outfalls/interconnections screened **during this reporting period.***

Number of outfalls screened:

*Below, report on the percent of outfalls/interconnections screened **to date.***

Percent of outfalls screened:

Optional: Provide additional information regarding your outfall/interconnection screening:

Complete outfall inventory/ranking is provided with the SWMP/IDDE Plan

Catchment Investigations

If conducted, please submit all data collected during this reporting period as part of the dry and wet weather investigations. Also include the presence or absence of System Vulnerability Factors for each catchment.

- No catchment investigations were conducted
- The catchment investigation data is attached to the email submission
- The catchment investigation data can be found at the following publicly available website:

*Below, report on the number of catchment investigations completed **during this reporting period.***

Number of catchment investigations completed this reporting period:

*Below, report on the percent of catchments investigated **to date**.*

Percent of total catchments investigated:

Optional: Provide any additional information for clarity regarding the catchment investigations below:

A total of 14 catchments out of 32 are complete (44%), including all Problem Outfall catchments. One of the problem outfall catchments (OF-2) has a confirmed illicit discharge that will be eliminated in PY8, and therefore will require some follow-up investigations in PY8.

IDDE Progress

If illicit discharges were found, please submit a document describing work conducted over this reporting period, and cumulative to date, including location source; description of the discharge; method of discovery; date of discovery; and date of elimination, mitigation, or enforcement OR planned corrective measures and schedule of removal.

- No illicit discharges were found
- The illicit discharge removal report is attached to the email submission
- The illicit discharge removal report can be found at the following publicly available website:

*Below, report on the number of illicit discharges identified and removed, along with the volume of sewage removed **during this reporting period**.*

Number of illicit discharges identified:

Number of illicit discharges removed:

Estimated volume of sewage removed: gallons/day

*Below, report on the total number of illicit discharges identified and removed to date. At a minimum, report on the number of illicit discharges identified and removed **since the effective date of the permit (July 1, 2018)**.*

Total number of illicit discharges identified:

Total number of illicit discharges removed:

Optional: Provide any additional information for clarity regarding illicit discharges identified, removed, or planned to be removed below:

One illicit discharge was identified during the PY7 reporting period (73 Betts Rd) and it is scheduled to be eliminated during PY8. The Town filled in some gaps in older records for illicit discharges prior to the effective date of the permit (since May 2017), and therefore the total number of illicit discharges identified and removed increased since the PY6 annual report. See illicit discharge removal report for more information.

Employee Training

Describe the frequency and type of employee training conducted **during this reporting period:**

An employee training session regarding the IDDE program and SSOs was conducted during this reporting period on June 24, 2025, and is intended to be held annually in the future for DPW Employees.

MCM4: Construction Site Stormwater Runoff Control

*Below, report on the construction site plan reviews, inspections, and enforcement actions completed **during this reporting period.***

Number of site plan reviews completed:

Number of inspections completed:

Number of enforcement actions taken:

Optional: Enter any additional information relevant to construction site plan reviews, inspections, and enforcement actions:

MCM5: Post-Construction Stormwater Management in New Development and Redevelopment

As-built Drawings

*Below, report on the number of as-built drawings received **during this reporting period.***

Number of as-built drawings received:

Optional: Enter any additional information relevant to the submission of as-built drawings:

Street Design and Parking Lots Report

Below, describe any changes made or planned to be made to local regulations and guidelines based on the report completed in Year 4:

Stormwater bylaw and regulations updates have been made. Other regulatory documents were identified for potential updates in the future in coordination with other efforts, as their impact is limited.

Green Infrastructure Report

Below, describe progress towards making green infrastructure practices allowable based on the report completed in Year 4:

The Green Infrastructure Report was completed in Year 5 together with the Street Design and Parking Lots Report. See response above which applies to both.

Retrofit Properties Inventory

Below, list remaining permittee-owned properties that could be modified or retrofitted with BMPs to mitigate impervious areas (must maintain a minimum of 5 sites in inventory until less than 5 sites remain):

The Retrofit Property Inventory was developed during PY5. Top five (5) sites include:

- 95 Washington Street (W L Chenery Middle School) - IN DESIGN PY7, includes infiltration chambers and modification of existing detention basins.
- 10 Claflin Street (Claflin Street Parking Lot),
- 121 Orchard Street (Roger E Wellington Elementary School),
- 90 White Street (Daniel Butler Elementary School), 3
- 10 Trapelo Road (Pequossette Park/ VFW Post 1272 Parking Lot)

Below, list all properties that have been modified or retrofitted with BMPs to mitigate impervious area that were inventoried as part of 2.3.6.d of the permit and the type of BMP(s) implemented. Non-MS4 owned properties that have been modified or retrofitted with BMPs to mitigate impervious area may also be listed, but must be indicated as non-MS4.

Two parcels, the Viglirolo Skating Rink and Belmont Public Library, are currently being redeveloped and will include stormwater retrofits (in construction PY7). Types of structural BMPs include infiltration trenches, rain gardens, and proprietary structures (jellyfish filters).

MCM6: Good Housekeeping

Catch Basin Cleaning

*Below, report on the number of catch basins inspected and cleaned, along with the total volume of material removed from the catch basins **during this reporting period.***

Number of catch basins inspected:

Number of catch basins cleaned:

Total volume or mass of material removed from all catch basins:

Below, report on the total number of catch basins in the MS4 system.

Total number of catch basins:

If applicable:

Report on the actions taken if a catch basin sump is more than 50% full during two consecutive routine inspections/cleaning events:

Amount of sediment/debris in CBs has not been documented in the past, but will be added into the next CB cleaning contract during Year 8.

Street Sweeping

*Report on street sweeping completed **during this reporting period** using one of the three metrics below.*

- Number of miles cleaned:
- Volume of material removed:
- Weight of material removed:

Stormwater Pollution Prevention Plan (SWPPP)

*Below, report on the number of site inspections for facilities that require a SWPPP completed **during this reporting period**.*

Number of site inspections completed:

Describe any corrective actions taken at a facility with a SWPPP:

SWPPP Inspections completed 9/20/2024, 12/11/2024, 3/21/2025, and 6/6/2025. No corrective action needed

Additional Information

Monitoring or Study Results

Results from any other stormwater or receiving water quality monitoring or studies conducted during the reporting period not otherwise mentioned above, where the data is being used to inform permit compliance or permit effectiveness must be attached.

- Not applicable
- The results from additional reports or studies are attached to the email submission
- The results from additional reports or studies can be found at the following publicly available website(s):

If such monitoring or studies were conducted on your behalf or if monitoring or studies conducted by other entities were reported to you, a brief description of the type of information gathered or received shall be described below:

Additional Information

Enter any additional information relevant to your stormwater management program implementation during the reporting period. Include any BMP modifications made by the MS4 if not already discussed above.

Year 8

Activities Planned for Next Reporting Period

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 8 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree

Annual Requirements

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in connection with the dry weather screening and other relevant inspections conducted
- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program

- Conduct site inspection of construction sites as necessary
- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all curbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings and facilities, and vehicles and equipment; update if necessary
- Review O&M programs for all permittee owned facilities; update if necessary
- Implement all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implement program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Enclose all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Review as-built drawings for new and redevelopment to ensure compliance with post construction bylaws, regulations, or regulatory mechanism consistent with permit requirements
- Inspect all permittee owned treatment structures (excluding catch basins)
- Identify additional permittee-owned properties that could potentially be modified or retrofitted with BMPs to reduce impervious areas so that the permittee maintains a minimum of 5 sites in their inventory, until such a time when the permittee has less than 5 sites remaining

Provide any additional details on activities planned for permit year 8 below:

The Town plans to move forward with implementation of a stormwater utility during PY8 to help fund future stormwater projects, in particular to support implementation of the Charles River PCP.

The Town is also working with the Mystic River Watershed Association (MyRWA) on a grant that if awarded will provide \$120k for an estimated 8 infiltration trenches town-wide.

Part V: Certification of Small MS4 Annual Report 2025

40 CFR 144.32(d) Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
